

Project 'ArcheoAPPS'

PROGRAMME	????????????????
TITLE PROJECT	ARCHEOAPPS Archaeology for Adriatic Ports in Protected Sites
LEAD PARTNER	????????????????
MISSION	<p>"locating archaeological sites of port structures along the Adriatic coasts"</p> <p>The identification of a site containing ancient remains of a port structure or even of a minor landing facility is not only an interesting fact in itself, but also provides an important added value to those areas. The interested MPAs will therefore be in a position to combine the quality of their preserved natural environment with their archaeological assets, thus making their sites more attractive for visitors.</p>
OBJECTIVES	<ul style="list-style-type: none"> • Establish an archaeological map of ancient port structures and minor landings within the PMA and CPA (Coastal Protected Areas). • Systematic study of identified archaeological sites • Review the overall historical environment in relation to those sites; potentially leading to the establishment of routes/trade exchanges in the Adriatic Sea. • Excavation and preservation 'in situ' of identified structures • Identification of the site with proper displays and illustrative panels • Identify, wherever possible, underwater routes that will both allow visitors to visit the remains, and to familiarize themselves with the marine environment • Promote cultural activities and events around the sites in order to attract visitors, and highlighting, to visitors and local authorities, the importance and cultural role of the PMA • Creation of a network of PMA with archaeological sites, in order to establish a well identified Adriatic connected coastal route for visitors with a particular interest in the historical/archaeological field
DEADLINE	????????????????
INFORMATION REQUIRED TO PARTNER	<ul style="list-style-type: none"> • Company name • list of European funding received within the past three years • name of the contact person for the project
